

T/CCI German Offices Support Growth throughout Europe

As reported on prlog.org:

March 5, 2015 - *PRLog* -- T/CCI (www.tccimfg.com) is a global leader in the manufacturing of heavy duty compressors and clutches for the mobile air-conditioning and refrigeration industries. T/CCI President Richard Demirjian recently shared, "We have an aggressive growth strategy globally that includes a focus on expanding our manufacturing, warehousing and sales footprint in Europe and worldwide. We are committed to developing new market opportunities, supporting aftermarket distribution as well as expanding logistics to meet the global product delivery needs of our OEM customers."

"It became evident as T/CCI looked to further grow and support our European base that we should be in a location that provides access to one of the largest ports in Europe and allows us to easily bring in freight, warehouse and distribute product and provide quick direct response to our valued customers," Demirjian added. In 2014 the company acquired BWD Automotive, a long-standing and trusted partner for support and growth of this market. Their reputation as a highly respected leader in the International automotive OEM and aftermarket business is unmatched and will allow T/CCI to serve the fast-growing European market. The European office partner's with engineering and sales teams and the customer; together they respond to product development and delivery needs. In addition to Jörg Lehmann, T/CCI's Sales Director for the European market, the following support TCCI European offices: Olaf Timm, Matthias Ostriga, Florian Münnich, Kathryn Irmen, Claus Lardy, Rolf Schade, Hendrik Diestel, Gudrun Becker, Christiane Feill, Jacqueline Lamp'l, William Enebechi, and Wolfgang Müller.

With manufacturing sites in China, Germany, and the United States, T/CCI provides the industry with the latest in innovative compressor designs. T/CCI services customer needs globally by strategically locating people and offices regionally (zones), enabling T/CCI to work jointly with customers on new programs, provide application expertise, and deliver the product less costly and on time. TCCI's zone approach embraces a culture and communication environment that supports the global nature of the industry. TCCI's European office enables the company to work more efficiently and cost effective logistically from a product distribution standpoint for the customer.

T/CCI manufactures built to last quality, dependable, and environmentally safe compressors for a wide range of vehicle applications. Widely respected, ISO-certified T/CCI is a global leader with over 50 years' experience manufacturing heavy duty compressors and clutches for the mobile air-conditioning and refrigeration industries, including for a wide range of vehicles from construction and military to heavy-duty trucking and bus transit. This wide range of OEM heavy duty compressors supplies companies such as Caterpillar, CNH, Navistar, ThermoKing, and Carrier. Global customers recognize value of a well-respected HVAC supplier with advanced technologies including the custom LabView based acquisition system designed to protect the quality and accuracy of data.
